

# Skyline's WindScape Trade Show Exhibit System Debuts As First Line Of Inflatable Booths In New York

*Skyline Exhibits has designed the first-ever line of fully inflatable displays in New York.*

HAUPPAUGE, NEW YORK, USA, August 1, 2013

/EINPresswire.com/ -- Skyline Exhibits' newest trade show booth display line is one of the most innovative designs ever, promising to make exhibiting easier on both backs and budgets. The [WindScape](#) exhibiting system is fully inflatable, a first in trade show booth design, and is available exclusively at [Skyline New York](#).

The Skyline WindScape in New York relies on cutting-edge technology to quickly inflate an inner air tube. That tube is covered by a fabric frame. Together the frame and the air tube create a completely solid and sturdy display that sets up in a fraction of the time that traditional displays require.

"There is no easier display to set up than WindScape. Everything is done for you. With the push of a button, the display inflates on its' own and you're done. It is very lightweight, compact and portable which saves companies money on shipping and drayage costs and saves huge amounts of time during set-up and tear down. WindScape is the best choice for exhibitors that want to cut costs and save time," said [Robert Watson](#), President, Skyline New York ([www.skylinenewyork.com](http://www.skylinenewyork.com)).

“

WindScape can be used for many different purposes beyond the trade show floor.”

Skyline New York*

Skyline WindScape is New York's solution to complicated booth set-up. The WindScape displays in New York are available exclusively from Skyline New York.

WindScape displays at New York's Skyline facility are

available in 46 different exhibiting shapes and sizes. WindScape is available as a small table top display, a full-size exhibit backdrop, hanging displays and even 16-foot towers and conference rooms. These inflatable booths in New York all pack down into compact sizes, fit into an included rolling carry case and come with a rechargeable battery pack or universal plug-in for inflation and deflation. Several models can even go a carry on luggage that fits in the overhead on planes.

Skyline Exhibits has been working on the technology to provide inflatable displays in New York for several years. With the technology perfected, the company turned its attention to functionality and cost-effectiveness. As a result, the WindScape graphics panels are fully interchangeable, providing exhibitors with flexibility to change messages or the look of the exhibit. WindScape is also fully integratable with other Skyline displays allowing exhibitors to create a custom, one-of-a-kind look for their display.

"WindScape can be used for many different purposes beyond the trade show floor. Creating temporary walls or exhibits for special events, pop-up displays in retail locations or even a backdrop for a photo shoot are just some of the other uses for WindScape, but the possibilities truly are endless. WindScape will transform the exhibiting industry," noted Watson.
