

Crawler Unveils 'My Logon Manager' - AutoFill Forms & Safely Get Bookmarks & Passwords From Anywhere

BOCA RATON, FL, USA, August 9, 2013 / EINPresswire.com/ -- Crawler Unveils "My Logon Manager" Allowing Users to Automatically Fill Online Forms, and Have Secure Access to Their Bookmarks, Login IDs, and Passwords From Anywhere

Crawler, LLC, a leading innovator of Internet technology and software solutions, announces the release of My Logon Manager, a [password management and form-filler](#) application that makes logging into websites and filling in web forms faster, easier, and more secure by eliminating the need to log into websites and fill in data manually.

By providing its users with complete control over their personal information and how the information is used on websites, applications and online forms, My Logon Manager has designed a secure application to store bookmarks, logins, passwords, and other personal data with security, speed and accuracy. The application not only integrates within the user's web browser such as Internet Explorer, Firefox or Chrome, but it also provides the user with an intuitive interface that enables management of all imported bookmarks and used passwords.

How it Works:

- My Logon Manager is a secure username and password manager, a [smart form filler](#) that can save the user time while browsing the Web, and is only active when filling out forms or entering User IDs & Passwords, so it doesn't consume any system resources while surfing.
- My Logon Manager fills out web forms with one click and allows fully customized profiles for multiple users sharing the same computer.
- My Logon Manager provides [access from anywhere](#). With their web account, the user can

My Logon Manager fills out web forms with one click and allows fully customized profiles for multiple users sharing the same computer.

access their Logins, Bookmarks, Identities and Notes from anywhere in the world.

My Logon Manager stores, saves, and organizes personal information through the local application or web account, all accessible using a single master password. Website logins, application user authentication, and online forms can be automatically filled in with one click, saving time and keystrokes while reducing security risks and typing errors. My Logon Manager also features a virtual keyboard preventing key-loggers from recording keystrokes of personal data.

Their data security features include encryption of data transfers and personal information stored on enterprise-grade cloud servers. The user's data is regularly synchronized and accessible anytime with any web-enabled computer or most mobile devices. My Logon Manager automatically synchronizes local copies of data allowing offline access to the most current personal information and ensuring data availability in case of dropped Internet connections or service disruptions.

My Logon Manager also includes a convenient toolbar for some browser versions, providing direct access to stored logins, bookmarks, identities and notes while browsing the Web. The current release of My Logon Manager is compatibility with Windows XP® 32/64-bit, Windows Vista®, Windows® 7 32/64-bit, Windows® 8, Mac® OS X®, Apple® iOS and Android™ and works with Internet Explorer®, Mozilla® Firefox®, Google Chrome®; and Safari®.

My Logon Manager is worth having when you need to store, save, synchronize and control your personal information for use on various websites and web forms. Application download and more information is available on the My Logon Manager website at www.mylogon.com
