

E & B Carpet Cleaning in St. Louis Offers 20% off Residential Carpet Cleaning for Summer Savings

ST. LOUIS, MO, USA, August 15, 2013 /EINPresswire.com/ -- [Carpet cleaning in St. Louis](#) is essential in helping to protect any flooring investment. To ensure optimal performance, regular carpet cleaning from E & B Carpet Cleaning should be part of any home maintenance program.

Carpet can act as a filter for dust, dirt, and other contaminants, helping to keep air clean. Since most people spend a great deal of their time indoors, clean carpet can provide significant health benefits. Regular carpet cleaning in St. Louis from E & B Carpet Cleaning can help anyone easily defend their flooring investment. Odors and stains are no match for the deep-down clean achieved by the modern tools and cleaning supplies utilized by this [St. Louis carpet cleaning company](#).

Did you know that carpet will benefit from a deep cleaning even when it may not appear soiled? Carpet typically masks soil, stains and abrasions, unlike hard flooring surfaces that readily reveal that maintenance is needed. Carpet must be proactively maintained before soiling becomes noticeable. An experienced technician from this carpet cleaning company in St. Louis can help busy families develop a regular cleaning schedule to keep floors looking great.

To ensure maximum performance of carpet, a regular carpet cleaning in St. Louis should be part of any home maintenance program. Dirt and soil not only affects the appearance of fabric, but the friction caused by its undetected presence has proven to be the greatest factor to premature fiber damage. This type of damage is not correctable and has been proven to be one of the greatest contributors to early carpet replacement.

To maintain indoor air health, E & B Carpet Cleaning employs the use of non-toxic carpet cleaners that are biodegradable. The toxins and chemicals found in conventional carpet cleaners can trigger asthma symptoms, allergies, or bronchitis for family members that suffer from those types of ailments. Non-toxic products do not affect these existing conditions. Green carpet cleaning is safe for children, pets, and people suffering with allergies while being safe for the environment.

To learn how to improve the health of any home while enjoying 20% off residential carpet cleaning from this carpet cleaning company in St. Louis, MO, visit <http://www.carpetcleaners-stl.com/>.
