

Teledynamics to Distribute nexMatrix μ SOHO (micro-SOHO) PBX

Full-featured IP PBX for Small Office Deployments

NAMPA, ID, USA, August 23, 2013 /EINPresswire.com/ -- nexMatrix Telecom has announced that Teledynamics, LLP of Austin, Texas, will begin distributing the μ SOHO ([MicroSOHO](#)) IP [PBX](#).

The μ SOHO is a compact premise PBX appliance that will support up to 10 IP phone extensions and offers a complete set of advanced PBX features, including voicemail-to-email, conference bridging, unlimited auto-attendants, ring groups, paging and much more. It also delivers key system emulation, allowing users to place a call on hold and pick it up from any extension without transferring.

According to company officials, the μ SOHO can be easily deployed by using a built in Wizard, which guides the user step-by-step through common PBX configurations, phone provisioning and SIP trunking. Savvy users can also use the Protel Classic programming interface, which allows for more complex configurations with multiple attendants, DIDs, ring groups, etc.

According to Dianne Ursini, CEO of nexMatrix, bringing Teledynamics on board as a distribution partner will be a win-win for both companies. "Our Protel product line is well established in the IP PBX marketplace. We market that equipment line exclusively through our network of Value-Added Resellers and will continue to do so," Ursini stated. "By making this new product available through a distributor with the reputation that both nexMatrix and Teledynamics have will greatly enhance our visibility as a US manufacturer of superior PBX products," she added

"Adding nexMatrix product line was a smart and easy decision," said Daniel Noworatzky, Sales Engineer at Teledynamics. "Given the ease of use and rapid growth in the IP PBX market, we feel that the Protel product line by nexMatrix will expand our IP PBX diversification and give the reseller channel another trusted product to fill another gap in their overall open source solution," he added.

Both companies will have products on display at the Internet Telephony Expo, a TMC trade show event taking place August 27-29 at the Mandalay Bay Hotel and Convention Center in Las Vegas. Ursini and Noworatzky said that visitors to their respective booths, 227 and 530, will be able to enter drawings for μ SOHO and compatible IP phones to be given away at the show.

Orders for the µSOHO and questions about pricing should be directed to Jeremy Castro at Teledynamics at 512-929-6100. Details about the product, including specifications, are available on the nexMatrix website at www.nexmatrix.com/soho-pbx-small-business
