

Simply E Cig Announces - Best Electronic Cigarette Starter Kits UK

Based in Great Britain, Simple E-Cig has announced the best E-cigarette starter kits available in the market.

BLACKBURN, LANCASHIRE, UK, August 24, 2013 /EINPresswire.com/ -- Based in Great Britain, Simply [Ecig](#) has announced the Best Electronic Cigarette Starter Kits available in the market. They announced a premium package for the smoker with a conscience and a care for the people who are usually affected by the smoke created by their smoking. E-Cig is an electrical device used by the smokers to get the nicotine boost with [E Liquids](#); it is the new way of smoking in which one gets the nicotine without the regular cigarette's smoke. It is as effective and satisfying as regular cigarette.

These devices consist of many parts like e-liquid, a re-chargeable battery, atomizer, adapter etc... this device is becoming very well-known among smokers of many countries. From Great Britain to Europe, USA and Middle East, almost everywhere people are changing the mode of smoking and instead of regular cigarettes; they have started using e-cig. The most important reason for this change is that the e-cig is a cigarette without smoke. Its vaporizing technique creates a non-smoke nicotine boost for the lungs and the whole satisfaction of a drag and inhale completed without any smoke. This makes it a healthier option for the people around the smoker, who are called passive smokers. They are those who are exposed to the second hand smoke, which is considered to be dangerous.

A spokesperson from Simply E-Cig told the news person that, "We at Simply E-Cig are very dedicated to bring a product to the market which is low cost and the best quality available. The company is focusing on the quality and anyone can check the reviews on our websites, left by the users. E-cig is also bringing the best starter kits for the new users, who will be happy that these kits are specifically designed to facilitate anyone fresh to the concept of [electronic cigarettes](#)."

These starter kits are particularly ideal for those who want to switch from regular smoking habits to an option that is considered to be healthier by many.

Now this way of smoking is accepted almost everywhere. People do not dislike e-cig smoking as it does not create any harmful smoke or vapors. Simply E-Cig is providing very cost effective and reasonably priced electronic cigarettes and this device looks like a regular cigarette. It's shape

and feel is like the regular cigarette, there is even a small light emitted from the end of the cigarette to give the e-cig a closer appearance to a regular cigarette.

Simply E-Cig is one of the leading companies in e-cig manufacturing. They take pride in their e-liquid quality and they are planning to bring new modified and better devices in the future, so that their product is more user-friendly. They believe that many e-cig manufacturers are buying sub-standard e-liquid and selling it as their own. Simply E-Cig produces their own e-liquid and quality control is guaranteed by the company. Their future plans include tight quality control in making best appliances for smokers and the best quality e-liquid to enhance the satisfaction of their customers.

www.simplyecig.co.uk was launched in early 2012, and is a UK based supplier of premium Electronic Cigarettes, E-Liquid and cigarette accessories to customers in the UK and worldwide
