

Arbor Networks to Host Webinar on DDoS Attacks: The Scale of the Problem

BURLINGTON, MASSACHUSETTS, UNITED STATES, August 26, 2013 /EINPresswire.com/ -- Arbor Networks, Inc., a leading provider of network security and management solutions for enterprise and service provider networks, is hosting an educational webinar, this coming Thursday, August 29 at 12:00 p.m. ET. The webinar will look at the rise of ideological hacktivism and its impact on the DDoS threat landscape.

WHO:

Featured Presenter: Gary Sockrider, Solutions Architect for the Americas, Arbor Networks

WHAT:

The motives behind DDoS attacks have broadened. The rise of ideological hacktivism, for example, has led to a wide range of organizations being targeted, as seen in frequent mainstream press coverage. DDoS attacks have also increased in size and complexity.

The average volumetric attacks (up 43% so far in 2013, over 2012) are now capable of saturating the Internet connectivity of many businesses. This reality is driving end-users toward cloud service and managed security service providers (MSSPs) for protection.

Join us for this webinar to learn more about:

- The motives behind DDoS attacks today
- The latest trends in DDoS attack activity and growth
- The importance of scalable service provider/cloud-based DDoS mitigation services

Can't make the live webinar? All registrants will have access to the on-demand webinar replay, so register today!
