

DataNumen SQL Recovery Introduces Support for Huge Databases

DataNumen, a leading provider of database recovery solutions, announces the release of DataNumen SQL Recovery version 1.1.

HONG KONG, KRASNOYARSK, HONG KONG, August 28, 2013 /EINPresswire.com/ -- DataNumen, a leading provider of database recovery solutions, announces the release of DataNumen SQL Recovery version 1.1. The program repairs damaged and corrupted MDF files, recovering deleted or lost records and fixing broken database structure and data.

A damaged structure of a database can lead to many problems. Reading, writing and accessing such a corrupted database will be affected, if not worse. But errors and damages in a huge base can be catastrophic.

DataNumen SQL Recovery aims to fix multiple problems Microsoft SQL Server database files may have, by performing thorough and in-depth analysis of virtually every single byte of the problematic MDF file to provide a fix for a host of typical issues. In particular, it can fix broken structure and data of the database, recover data of all data types, except XML, and recover deleted records and empty columns.

MDF is the main database format for Microsoft SQL Server, so DataNumen SQL Recovery supports all versions and types of this format, including SQL Server 2005, 2008, 2008 R2 and 2012 MDF formats.

One of the major advantages of the program is that it can process a batch of databases at once. Fixing multiple files is as easy as fixing just one: a simple drag and drop operation not only performs recovery of the selected MDF files, but also checks, and if needed, fixes all associated NDF files too.

“Consistency of MDF files is a pledge of firm and reliable operation of any Microsoft SQL Server database. And DataNumen SQL Recovery helps retaining such consistency”, concludes Chen Chongwei, president and chairman at DataNumen.

Pricing and availability

DataNumen SQL Recovery is available for all Windows versions, both 32-bit and 64-bit editions. The cost of a license is \$499.95 with serious volume discounts available.

About

With over 12 years experience and thousands of customers all over the world, including such well-known companies as IBM, AT&T, Microsoft, Dell, Intel, J.P. Morgan Chase, Ford and others, DataNumen is a major player on the data recovery market. Specializing in data recovery, this Hong Kong company offers solutions to recover lost and damaged data from databases, documents, compressed files, e-mail messages and file systems.
