

New England Radon Warns Home and Business Owners of the Dangers of Indoor Air Quality

SALEM, NH, USA, August 28, 2013 /EINPresswire.com/ -- New England Radon in Salem, New Hampshire, wants home and business owners to be forewarned and informed about the dangers of indoor air pollution. The company offers tips to mitigate its sometimes deadly dangers.

New England Radon, a [radon mitigation company in Salem](#), New Hampshire, wants home and business owners to be forewarned and informed about the dangers of indoor air pollution. The company offers tips to mitigate its sometimes deadly dangers.

Since 1986, New England Radon has been offering [radon testing in New Hampshire](#), Massachusetts and Vermont. The company wants to caution everyone in New England about the potentially life-threatening dangers of radon, which is odorless and tasteless. The only viable way of discovering radon in the interior of a building is to have a certified professional conduct indoor air testing. As well, the professional radon testers are able to note and repair incorrect ventilation, in which air quality levels can become toxic very quickly.

As a fully licensed and insured radon testing company in Salem, the staff at New England Radon is certified by the National Environmental Health Association (NEHA) and is accredited by the National Environmental Laboratory Accreditation Program (NELAP) to perform radon testing, radon mitigation, and water mitigation. The company is known for its efficient and thorough work.

Daniel Espinal, a company spokesperson, says, "Since radon is odorless, tasteless, and colorless, the only way to ensure that radon isn't present in your air or water supply is with the assistance of a qualified professional. New England Radon has more than 30 years of knowledge and experience in radon mitigation."

If anyone is concerned about the possibility of radon in the environment—inside or out—it is wise to contact a professional radon mitigation company such as New England Radon. As radon is also a leading cause of lung cancer in the United States, it might pay for business and home owners to be on the safe side and have their air and water supplies tested for quality and the appearance of any levels of radon.

About New England Radon
