

Luxury Meets Technology with the 2014 Cadillac CTS

CentralFloridaCadillac.com reviews the technology that powers the 2014 Cadillac CTS

ORLANDO, FL, USA, August 30, 2013 /EINPresswire.com/ -- The [newly redesigned 2014 Cadillac CTS](#) offers features and benefits that create strong competition for the other midsize luxury sport sedans, such as the Infiniti M, Mercedes Benz E-Class and Audi A6. This newly released version provides wide arrays of new equipment, trim levels and powertrain choices.

Cadillac CTS Technology

One example of the new technology of the 2014 Cadillac CTS that you can experience first hand at an Orlando Cadillac dealer include an automatic parking system, which provides the ability for the car to steer into a parallel parking space, leaving the driver to operate the accelerator, break and transmission. The new technology has provided incentives for many people to come by just to see what the new Cadillac technology has to offer.

Cadillac CTS Interior and Exterior

The 2014 Cadillac CTS provides more room than the previous model. Each model is also able to be customized with eight different interior colors and trim combinations. For optimum comfort, consumers can also have semi-aniline leather front seats, which feature 20-way power capabilities installed.

The exterior car is updated and more sophisticated than previous models, as well. For example, this model offers Cadillac's signature vertical LED running lights and taillights. The 2014 Cadillac CTS weighs in at the lightest in its class, weighing only 3,616 pounds in the base format. The exterior can be customized with either 17-inch or 18-inch aluminum wheels.

Cadillac CTS Engine Options

This model provides three different engines to choose from. The standard engine provides a turbocharged 2.0 liter, 4 cylinder rated to produce 272 horsepower. The other engine options include a 6-speed transmission that has been equipped with paddle shifters and a 3.6 liter V-6 engine. This option is exclusively offered for the new, twin-turbocharged engine. Each engine provides the speed and power that is expected from a vehicle under the Cadillac name.

Cadillac CTS Safety Procedures

In addition to the many interior, exterior and engine features and options, Cadillac has also increased the standard safety features on every 2014 Cadillac CTS. This includes 10 air bags, as well as OnStar telematics that includes one year of free services for Automatic Collision Notification. The sensors for rear park-assist are included standard in each vehicle, reducing the chances of accidents in parking lots.

Cadillac can install some optional safety features including a reversing camera with a real cross-traffic alert system. Some other new safety options that are offered include adaptive headlights that aid when driving around dark curves, Panic Brake Assist, lane-departure warning, side blind-zone alert, forward-collision warning and a rear and front braking system. Many of these new technologies are also equipped to provide a vibration in the driver's seat to warn the driver, without alarming them.

Each of these new features has streamlined the Cadillac to offer the newest technology that is in demand by modern consumers. If you are interested in experiencing the technology yourself test drive a [2014 CTS in Orlando](#) or call your local [Central Florida Cadillac dealer](#).
