

Technip and Sasol form engineering alliance on GTL | Network with these companies and more at SMI's Gas to Liquids

SMI's 16th annual Gas to Liquids Conference and Exhibition will address GTL market progress from around the world with leading industry innovators.

LONDON, ENGLAND, UNITED KINGDOM, September 2, 2013 /EINPresswire.com/ -- Technip and Sasol, the owner of the world's leading gas-to-liquids ([GTL](#)) technology, have established an alliance for front-end engineering services for future Sasol [GTL projects](#). The alliance also allows for Technip's participation during the execution stage of future GTL projects. Officials said the alliance, which builds on existing relationships, aims to

achieve strong capital productivity through the highest standards of HSE, operability, accelerated innovation and reduced project cycle times. GTL technology is becoming increasingly important not only for the environmental advantages of its products, but also because it provides an efficient and safe solution for the transportation of natural gas.

Against this backdrop, SMI's 16th [Gas to Liquids](#) conference will address these latest developments and much more, playing host to the world's foremost authorities on GTL including Sasol North America, BP and Exxon Mobil among others. The meeting will provide the ideal platform for discussion and debate over current and emerging GTL projects, developments within the industry, technology sessions and interactive panel debates. This year's Gas to Liquids will build upon the 2012 event with industry leaders discussing the latest hot topics including: shale gas reserves reshaping and providing opportunities for the GTL market, new technologies being proven at scale like the Fischer-Tropsch process, and new projects from an array of GTL giants.

Speaker Panel includes:

- Mark Schnell, General Manager, Marketing, Strategy and New Business Development, Sasol North America
- James Vaughan, General Director, OLTIN YO'L GTL
- Mitch Hindman, Licensing Manager, Exxon Mobil
- Robin Holford, Conversion Technology, BP
- Jeff McDaniel, Commercial Director, Velocys
- Shravan Joshi, Business Development Manager, CompactGTL
- Sébastien Boucher, XtL Technology Manager, Axens
