

Skyline Exhibits Partners With Octanorm For International Distribution of Trade Show Exhibits

Skyline Trade Show Displays has teamed with global exhibit provider Octanorm.

EAGAN, MN, USA, September 4, 2013

/EINPresswire.com/ -- [Skyline Exhibits](#), the leader in design and production of exhibit graphics and trade show displays in Canada, has announced a new global distribution agreement with German-based Octanorm®, GmbH. Octanorm will assume responsibility for international promotion and distribution of the new Skyline® WindScape™ Exhibit System.

Skyline Trade Show Displays has teamed with global exhibit provider Octanorm to promote and distribute the company's new line of Skyline® WindScape™ trade show exhibits.

"The Skyline WindScape technology is truly revolutionary, and our new relationship with Octanorm will allow for a much wider range of clients to experience this exciting exhibit system firsthand," said [Michael Thimmesch](#), Director of Customer Engagement for Skyline Exhibits.

“

Innovation is about leading rather than following, and Skyline WindScape is another example of our intention to continue the Skyline tradition of being a leader in the industry.”

Michael Thimmesch

Octanorm Service Partners International (OSPI) will work with Skyline's global network of dealers to distribute Skyline's newest offering around the world. Skyline dealers in the U.S. and Canada will continue to be responsible for domestic promotion and distribution.

The world's first air-powered exhibit system, Skyline® WindScape™ displays consist of frames that are inflated at the push of a button, eliminating nearly all of the often lengthy assembly time of tradition custom displays for a

tradeshow. Pre-attached fabric graphics add to the ease of installation. Skyline® WindScape™ exhibits are currently available in 46 shapes ranging from small tabletop designs to variations intended for larger conference rooms and exhibit halls, including 16-foot diameter hanging structures.

The tabletop Skyline® WindScape™ models, along with their inflator fit in a convenient backpack, while 10-foot backwall displays fit in carry-on sized cases, able to be stowed in a plane's overhead compartment.

"Innovation is about leading rather than following, and Skyline WindScape is another example of our intention to continue the Skyline tradition of being a leader in the industry. These new displays exemplify our goal of offering high-quality, convenience and cost-saving portability in all of our products," Thimmesch said.
