Since Green coffee and Green tea are the most common beverages used globally, they are also used as natural weight loss alternatives. Recent studies have found that their energy boosting properties are linked with their fat burning abilities. After extensive research, Green Coffee beans are found to be rich in antioxidants which play a vital role in fat burning. The secret agent behind its weight loss properties is chlorogenic acid, a powerful antioxidant which helps to boost metabolism.

Research shows that it inhibits fat absorption and stimulates the activation of fat metabolism in the liver, both major supporters of weight reduction. This natural phytochemical also found to inhibit the release of glucose into the blood particularly after meals, which, in result helps to lose weight. It also promotes thermogenesis, the natural burning of fat for energy.

Ingredients

Each capsule of Green Coffee Bean Extract is the blend of 100% pure Green Coffee bean extract and 45% chlorogenic acid.

Directions for use

For best results, experts recommend 800 mg of Pure Green Coffee Extracts three times a day 30 minutes before each meal.

Clinical results

Various people were gone through free clinical trials conducted by famous health researchers to find the effectiveness of Green Coffee Beans. The participants lost 17 pounds, lost 10% of overall body weight and reduced 16% of overall body fat in a period of 12 weeks. The most interesting thing is that it has shown no adverse side effects.
