

# DRX9000 Spinal Decompression Therapy Now Available at St. Louis Spine & Health Center

*In St. Louis, MO, St. Louis Spine & Health Center is proud to announce the use of the DRX9000 spinal decompression therapy unit.*

CREVE COEUR, MO, USA, September 9, 2013 /EINPresswire.com/ -- Chronic back pain and other related symptoms are painful and unwelcome distractions that affect many people. Chronic back pain is a frequent reason for doctor visits, short-term disability claims, and hospital admission and surgery. Those suffering from back pain may be unable to think of anything else except finding much-needed relief. St. Louis Spine & Health Center is proud to announce the use of the DRX9000 spinal decompression therapy unit, which provides effective [spinal treatment in St. Louis](#). The Center's [back pain doctor in St. Louis](#) specializes in spinal decompression.

Spinal decompression therapy works by stretching the spine, therefore changing its force and position. This gentle movement takes pressure off spinal disks, the gel-like cushions that sit between the spinal vertebrae that can become bulging or herniated. The DRX9000 can take pressure off the nerves and other structures in the spine, promote the movement of nutrient-rich fluids into these disks to promote healthy healing.

The DRX9000 calculates the precise angle and tension necessary for each patient to provide maximum results. The DRX9000 allows patients to enjoy the benefits of pain relief through a specific combination of spinal movements coupled with force applied at various intensities. Using state-of-the-art technology, the DRX9000 gradually relieves back pain by enlarging the space between spinal discs. Other treatments for back pain, such as medication and injections, only cover up the symptoms of pain. Unlike these other treatments, spinal decompression therapy actually heals the discs of the spine.

After just a few weeks of treatment with the DRX9000, clinical studies have shown a reduction in debilitating pain caused by ruptured disks, sciatica, arthritis, and scoliosis. Most patients report little to no discomfort during spinal decompression therapy. The DRX9000 is safe and comfortable for patients of all ages, which means that anyone can enjoy effective spinal treatment in St. Louis at St. Louis Spine & Health Center.
