

ITGP publishes new advice for using documentation toolkits with SharePoint

ELY, UK, September 17, 2013 /EINPresswire.com/ -- [IT Governance](#) is pleased to announce that its niche IT-GRC publishing imprint, IT Governance Publishing (ITGP), has released guidance on how to integrate ITGP documentation toolkits with SharePoint document management systems.

[ITGP toolkits](#) are designed to help organisations implement key management standards and frameworks such as [ISO27001](#), ISO22301, ITIL & ISO/IEC 20000. They are built using Microsoft Office 2007 and 2010 functionality, and can be used and maintained in SharePoint.

The guidance that is now included in all ITGP toolkits explains how users can integrate any of ITGPs toolkits with their SharePoint document management software.

SharePoint enables users to:

- manage version control for the toolkit
- regulate who has access to the toolkit
- build custom workflows to handle the process of approving developments in the toolkit

Further guidance on SharePoint is available from Microsoft and is also widely available on the internet.

If your organisation is currently using or intends to use SharePoint, this new guidance will allow you to make the most of your SharePoint document management system and ITGP toolkits.

Find out more about ITGP toolkits here: www.itgovernancepublishing.co.uk/toolkits.aspx.
