

Sonic Shield™ Combines Sound and Light to Critter-Proof Gardens and Yards

The Sonic Shield™, an innovative critter deterrent that employs light and sound, is being embraced by property owners to keep critters from damaging property.

IRVINE, CA, UNITED STATES, September 25, 2013 /EINPresswire.com/ -- [The Sonic Shield™](#), an innovative critter deterrent that employs light and sound, is being embraced by property owners to keep critters from damaging or defacing their property.

The “smart” [pest control device](#)

frightens unwanted critters and winged pests using harmless dog barking sounds and flashing LED lights. The versatile Sonic Shield™ has been scientifically designed to rid a property of a wide range of critters: voles, moles, squirrels, raccoons, possums, skunks, gophers, chipmunks, deer, virtually anything on four legs—even bats. There’s no need to buy poisons, repellents or traps for each critter, one compact device gets rid of all critters.

“

The Sonic Shield keeps your home and yard free of pesky critters like deer, raccoons, rats, birds and other animals using a safe and humane animal deterrent.”

Shaun Johnson, Bird-B-Gone, Inc.

Activated by a motion sensor, the Sonic Shield™ works in two modes—a daytime and nighttime mode. This affords property owners maximum flexibility in where and how it can be used most effectively. For the daytime mode, flashing LED lights and loud barking dog sounds combine to create a powerful deterrent to scare critters from the property. In the nighttime mode, only the flashing LED lights spring to life—ideal for densely populated neighborhoods where night noises would annoy

neighbors. No matter which mode is selected, the Sonic Shield™ offers a cost-effective way to rid yards and gardens of critters that threaten damage or defacement. The Sonic Shield is also superior to ultrasonic deterrents, which emit sounds most critters can’t hear.

The compact Sonic Shield™ is small and completely portable. It runs on just four standard AA batteries. So it can conveniently be mounted on patio covers, in a tree, on a fence, set on the ground, or anywhere critters try to enter or gather. There's no need for AC wired connections.

Bird-B-Gone is the world's largest manufacturer and distributor of bird and [critter control products](#), providing effective and humane solutions to a critter-free environment.
