

Global MilSatCom 2013 – Early bird expires in under one week

SMi's Global MilSatCom 2013, 5 – 7 November, London, UK

LONDON, UK, September 25, 2013 /EINPresswire.com/ --
INDUSTRY NEWS: US military communications satellite launched | [Click here](#) for satcom update

NEW SPEAKER : Harold Haney, Chief Space and Missile Defense C4 Division, USSTRATCOM

EVENT UPDATE : Only one exhibition space left. Please contact Alia Malick on +44 (0) 20 7827 6168

In recent weeks, United Launch Alliance launched an Atlas V containing the third Advanced Extremely High-Frequency communications satellite (AEHF-3) for the US Air Force. The Atlas V flew in 531 configuration, meaning it had a five-meter payload fairing, three solid rocket boosters to assist the first stage and a single Aerojet Rocketdyne RL-10 engine in the Centaur upper stage (18 September 2013, Flight International*)

The launch was declared a success by ULA and can be seen as a major victory for the US who are further advancing in the SatCom industry.

Have the chance to meet senior representatives including the US Air force and USSTRATCOM at this year's [Global MilSatCom](#) event; featuring a whole day's worth of industry-led case studies and presentations from NATO & Americas.

We are delighted to announce Harold Haney, Chief Space and Missile Defense C4 Division from USSTRATCOM, will be presenting on day 2 on 'Operational SatCom Management' which will provide a spotlight on:

- MilSatCom Management: Constellations, Policy and Operations COMSATCOM
- Management: Policy, Requirements Developments and Operations
- Future Expectations

Harold Haney commented:

"I am delighted to participate in this very important event. The opportunity to share my organization's satellite communication responsibilities and to discuss the future outlook with professionals from around the world is important and will be gratifying for me."
