

Increase efficiency of your tax and accounting practices with cloud computing

SageNext Infotech, a leading QuickBooks Hosting provider, provides an efficient and secure cloud computing solution that is accessible from anywhere and anytime

AUGUSTA, GEORGIA, USA, October 9, 2013 /EINPresswire.com/ -- If you have not been using Cloud Computing for your tax and accounting practices then you are a step behind. At the time, when entire world is moving ahead with this latest innovation of information technology, you may have been losing the potential of cloud accounting practices. In the modern days, the efficiency of tax and accounting operations hugely depend up on the IT infrastructure setup. If we have adequate system, software and network resources, we can definitely enhance our opportunities by serving many customers at a time across country. This is the time of tech-savvy tax and accounting professionals and maximum utilization of technologies have made the accounting process very accurate and lightening fast.

SageNext is a leading [QuickBooks Hosting Provider](#), specializing in hosting all tax and accounting applications. The company has SAS-70 and SSAE-16 certified data centers in New York, Dallas and Seattle. SageNext has many advantages over any other service provider such as:

1- Easy transition of your office over cloud: You don't require to purchase any additional hardware or software resources to use cloud computing in your practices. All your existing setup will be working to get all the benefits of [QuickBooks Hosting](#). You only need to supply your license details of the applications and SageNext completes all the necessary steps to get your cloud accounting ready in a few moments. You also don't need any IT professional to take care of your activities.

2- Data Security: SageNext practices with tough security measures to ensure the highest amount of data integrity. We have 3 levels of firewall before you server so that all communications are tightly checked before entering into your server. There is no chance of system getting infected with any virus, attacks. Data is backed up on daily basis at 3 different locations to ensure that the critical business data is always safe.

3- A complete platform for all your tax and accounting practices: You can get all your tax and accounting applications installed on the cloud server along with all other custom software and tools so that you could remove all your local dependency. As cloud computing is widely known for large storage, you can put all your office data to set up a complete online office, able to get

connected from all over the world.

4- Efficient printing and scanning function: SageNext uses the most comprehensive printing and scanning solution on the [QuickBooks Cloud](#) server which enable you to directly print and scan the server jobs to your local printer and scanner. You always feel like printing and scanning from your local printer and scanner.

5- It drastically reduces your monthly expenses: As discussed above, you get all these happening by just paying some nominal hosting fees. The hosting fees will be much lesser than the setup and management cost of your in house set up. The cloud practices will be highly customizable as per your requirement. If requirement goes up, the cloud resources will easily grow up just in a few moments. However, if the usage are less, you can easily scale it down to reduce your fees.

6- 24X7 free technical support: You enjoy a 24X7 free technical support with SageNext cloud accounting service. We have a dedicated team of experienced engineers to look after any issues that can arise in front of our clients. Maximum response matrix of the support team is only 10 minutes.

SageNext has been dealing in hosting services for more than 5 years. The company has more than 500 clients across USA, Canada. The company head office is located in Augusta, Georgia.
