

Boston Good Feet Offers Plantar Fasciitis Foot Pain Relief With Good Feet Orthotics

Leading International Retailer of Custom-Fitted Arch Supports Brings New Approach to Foot Pain Relief to Boston Local Community

BOSTON, MASSACHUSETTS, UNITED STATES, October 10, 2013 /EINPresswire.com/ -- Good Feet Worldwide, LLC., an international retailer of custom-fitted arch support, announced its foot pain relief process focusing on reducing plantar fasciitis foot pain and heel pain for Boston.

An estimated 87 percent of the general population suffers from foot-related problems, most of which can be linked to improper support for flat feet or high arches, wearing improper footwear, walking or standing on hard surfaces for long periods of time, being overweight or suffering from sports injuries. While many people looking for relief turn to the various arch supports and cushion products they see in retailers like drug and grocery stores, Good Feet takes the process to another level.

The Boston Good Feet's new plantar fasciitis foot pain relief process provides each customer with personal bio-mechanical balancing and measuring. The customer's primary activities and shoe style preferences are also taken into consideration prior to being personally fitted with arch supports that can provide them with the ultimate comfort, balance and support.

"If you are one of the many people who are seeking help for plantar fasciitis or lingering lower back pain, our Total Body Wellness System is highly recommended," said Tevis Runyan, owner of the Good Feet Stores in Massachusetts. "Our orthotics has helped hundreds of thousands of people. It is such a satisfying emotion seeing people walking out of the stores with a smile on their face after coming in with sadness and pain."

Good Feet Boston offers a non-medical solution to relieving foot pain, heel pain and plantar fasciitis through arch supports, insoles and cushions. As an alternative to painful medical visits, customers have found immediate relief from foot pain, heel pain, back pain and plantar fasciitis in Massachusetts through the use of the Good Feet arch supports.

Good Feet Boston heel pain relief products are designed to support all four of the foot's arches, which makes the personal fitting process so important. Through better arch support, a person's body weight can be more evenly distributed, which maximizes stability and balance. The Good Feet Boston foot pain relief products are also designed to reduce pressure and eliminate foot pain, knee pain and even back pain.

Good Feet store is located in Newtonville, Rockland, Framingham, Lexington and Andover. For details or directions, call 617-581-6989 or visit <http://www.goodfeet.com/boston>. Store hours are Monday-Friday 10:00AM-4:00PM and Saturday 10:00AM-5:00PM.
