

# Fungal Nail Treatment In Jacksonville Promises Pain Free Elimination Of Bothersome Nail Fungus

JACKSONVILLE, FL, USA, October 21, 2013

/EINPresswire.com/ -- Patients seeking discolored nail treatment in Jacksonville can receive pain-free treatment at [First Coast Foot & Ankle Clinic](#). The clinic's laser technology is effective for toenail fungus and thick nail treatment in Jacksonville.

First Coast Foot & Ankle Clinic has a safe, effective and pain-free way to provide fungal nail treatment in Jacksonville. The clinic's PinPointe Laser Treatment takes only 20 minutes per session and does not come with the side effects that are common with other nail fungus treatment options.

Patients seeking discolored nail treatment in Jacksonville can receive pain-free treatment at First Coast Foot & Ankle Clinic. The clinic's laser technology is effective for toenail fungus and thick nail treatment in Jacksonville.

"PinPointe Laser Treatment is the most effective way to treat toenail fungus. There are none of the side effects that we see with oral medications and the laser is much more effective than topical drugs. Most patients see a marked improvement after just one treatment but we always provide two treatment sessions to ensure complete fungus elimination," noted [Vimal Reddy](#), DPM, First Coast Foot & Ankle Clinic ([www.firstcoastfootclinic.com](http://www.firstcoastfootclinic.com)).

First Coast Foot & Ankle Clinic administers treatment using the FDA-approved [PinPointe FootLaser](#), the first laser cleared by the FDA to treat onychomycosis (toenail fungus) and for discolored nail treatment in Jacksonville. The machine delivers a high-powered pulse laser that destroys the nail fungus without damaging the underlying skin and has proven effective for thick nail treatment in Jacksonville as well.

"There are many other laser treatments on the market today but none of them have the clinical trials and success rating of the PinPointe FootLaser behind them. Getting rid of toenail fungus has historically been difficult and time-consuming but this new treatment option changes all of that. For patients who've lived with thick and discolored nails because nothing else worked, the PinPointe FootLaser can be just the thing they need to get rid of the fungal infection once and for all," said Reddy.

About First Coast Foot & Ankle Clinic:

First Coast Foot & Ankle Clinic uses the recently FDA approved, PinPointe Foot Laser to provide patients with the most advanced, comprehensive, nail fungus care available. Clinic staff pride themselves on treating the patient with the utmost respect, compassion, and understanding and take great care to educate the patient about their condition and treatment options as a way to encourage healing.
