About Open Server Summit

Open Server Summit ("OSS"), produced by Conference Concepts and formerly called Server Design Summit, celebrates its 5th anniversary on October 22-24 at the Santa Clara Convention Center. OSS focuses on the design of next-generation servers with topics ranging from semiconductors and network interface cards through powerful high-end systems and overall infrastructure design and operation. The conference also covers hyperscale computing, data center and server efficiency, cloud storage, virtualization, and liquid cooling. Industry visionaries will address the use of SSDs, microservers, software-defined networking, and other efforts toward combining industry-standard hardware with open-source software.
