

# Ajoft Technologies Launches Product Development For Mid -Sized Companies

*Software Development Company, Ajoft technologies launches product development for the mid-sized companies.*

NOIDA, UP, INDIA, October 24, 2013 /EINPresswire.com/ -- Noida, Wednesday, October, 2013 – Ajoft Technologies, one of the leading software development firm launches the product development for the mid-sized organizations. Started in 2006, this firm provides software development services to various companies. In a major decision in September, 2013, Ajoft Technologies has decided to expand its range of services which includes but not limited to software development, product development, SAAS development and business consulting.

“Increasing demand of product development in the world and poor product execution by the companies and high costs associated with products development has motivated us to come out with product development services through which we can ensure the top level product development services to our clients. Our past experience will help companies’ with their business analysis and market analysis, actual development and commercialization of the product” says Ashish Jha, President- Ajoft Technologies.

According to Mr. Sushant Sharma, (CMO), “We are pretty sure now mid-sized companies can avail our product development services with better ease. We have been able to reduce costs upto 60% to provide affordable product development services to mid sized enterprises. Our expertise team of Research and Development professionals will help them come out with the actual product without putting heavy constrains on their pockets. “

In addition to the launching the services, Ajoft Technologies will be providing the support through expert team of Research and Development to help customers out with their product. In other words, mid sized companies’ will get all round complete guidance for their product development from the expertise team of Ajoft Technologies. For more information, visit:
