

Dorothy M. Hartman vs. Patent and Trademark Office Officially Docketed in U. S. Supreme Court

Billions of websites and the INTERNET , her ideas alleges this Black inventor whose case will be reviewed by the Supreme Court .

PHILADELPHIA, PENNSYLVANIA, UNITED STATES, October 30, 2013 /EINPresswire.com/ -- Hartman says that she is happy that after 23 years of being ignored and not recognized or compensated for her invention that the U.S. Constitution is still the prevailing law in the United States . She is both humble and elated that the nation's highest Court will be reviewing what she says are illegal acts by the Patent and Trademark Office . She is hopeful that Justice might finally prevail after she in 1990 trusted the nation with her intellectual property only to be let down by power , greed , and institutionalized racism .

She has been involved with the modern day INTERNET since its inception as it was the result of her Business Method , Accessing Accessibility, being reduced to practice. This formed what was initially referred to as the Information Superhighway which morphed into the Internet- however , she is yet unknown in the field of telecommunications .

Although her websites <http://www.a-buy4you-jewelry.com> and others have been online since 2007 you would be hard pressed to find them in search results . Some of those who have become hugely successful because of the billions of people now online to which they can sell their wares have interfered with the online presence of her websites . Even as the Court has placed her case on the docket of cases to be reviewed – there are some web hosts , search engines, and others that continue to interfere with the presence of her websites online. "So much for gratitude . Time for the law to step in", says Hartman . This woman's struggle for recognition in a field that has exploded and succeeded because of her creative vision has lasted for 23 years! Hartman says that ironically this has been due to the tremendous success of the Internet . Those already in the telecommunications field profited immediately and immensely from the changes .

If you have tried to access her websites , <http://www.smartphoneelectronicsaccessories.com> or <http://www.TelecomStraightTalk.com> lately , you probably have encountered various errors as both her blogs have been consistently "down" or 'offline' as of late . She says those who are now able to enjoy successful corporations and jobs and positions of which they could only dream before 1990 now discriminate against her , the originator and inventor of the process that help

make the success possible .

This is why she has asked the High Court to review her case with the Patent and Trademark Office which she alleges is in violation of her Constitutional Rights so as to receive the recognition and compensation that she deserves . Hopefully , Justice will put an end to the abuse and disrespect that she has had to suffer while others have benefited from her intellectual property . This is America . This type of injustice should not be occurring- not for one who has contributed so much to the economy of the nation and has changed the way the world does business . Recently her websites have been hosted by <http://www.ipage.com> and secured by <http://www.sitelock.com> . She has been very disappointed . After all , it was her contributions that produced a telecommunications network that developed from one Cern Website in 1989 to an Internet Map as presented by the CNN Peer 1 App of billions of websites today . Her cry is “ ENOUGH DISRESPECT AND ABUSE , JUSTICE NOW ! ”
