

Mold Treatment Company Brings MoldExterm System to Tampa Bay Area

TampaBayMold.net Utilizing Latest Polymer/Silver Ion Technology to Combat Mold

TAMPA, FL, USA, November 1, 2013 /EINPresswire.com/ -- TampaBayMold.net, The Mold Treatment and Prevention Experts, will be using the [MoldExterm System](#) to clean, kill and prevent mold in its treatments. The system features the [anti-microbial](#) benefits of silver ions combined with a proprietary, patented polymer that gives long lasting protection from future mold growth on both porous and non-porous surfaces on which it is applied. There is a limited warranty available that applies to all treated surfaces with the system of 2 years or 3 water intrusions.

The MoldExterm System is a three part system:

- A: STEP 'A'(MM1)-EPA-registered, anti-microbial quaternary ammonium salt product.
- B: STEP 'B'(MM2)- a unique, proprietary, patented silver ion/polymer sealer
- C: DEHUMIDIFICATION

Biomedical inventor, Dr. Leonard Pinchuk, has formulated a two part Anti-Microbial Defense System that is a safe, efficient and economical product proven to kill a variety of bacteria, viruses and mold and prevent the return for extended periods of time. This Anti-Microbial Defense System provides a superior alternative to less effective methods of dealing with microbes.

"The MoldExterm System is fantastic. Most treatments can be done in a single day. Many times significant money can be saved by reducing the amount of building materials that would normally be disposed of in a traditional mold remediation project at a home or business," says David Koerner, VP/Technical Director for TampaBayMold.net.
