

Increasing Shoes Huge Sales Promotion Features Model Nicolas Hunter

Increasing Shoes, manufacturers and retailers of height increasing shoes, kicks-off a big sales promotion with model, and longtime client Nicolas Hunter.

SARASOTA, FL, USA, November 4, 2013 /EINPresswire.com/ -- Increasing Shoes, the retail and manufacturing leader in height increasing shoes, announces a huge sales promotion featuring an eye-grabbing photo shoot with longtime client and model Nicolas Hunter. The best known elevator shoe company in the business is now offering two sales options; buy 2 pairs of their height increasing shoes and get the 3rd pair at half-price or buy 3 and get the 4th pair free. Helping to "boost" the new sales event is Nicolas Hunter in a before and after pictorial on the homepage of the company's website.

The Nicolas Hunter photo shoot on Increasing Shoes' website is particularly striking for a number of reasons, not the least of which is that Hunter already stands 6 feet tall in his bare feet, underscoring the fact that height increasing shoes aren't just for short people. In the before and after pictorial, also featuring Hunter's girlfriend Chris, Hunter is boosted from 6' to 6' 5" with the help of what look like an ordinary pair of attractive men's shoes. He is also shown other photos on the company's homepage modeling several different pairs of Increasing Shoes.

In commenting on their new sales promotion, as well as Nicolas Hunter's eye-catching before and after photo demonstration, company president, Johnny Pak, said, "We are extremely happy to offer this big savings event to our customers because we know from experience that once a client sees the remarkable results from wearing our height increasing shoes they almost always want more than one pair." In noting the Nicolas Hunter photo shoot he added, "Nicolas has been a client since 2008, and he is a professional model so he is the ideal person for a photo shoot promoting Increasing Shoes on our website."

Increasing Shoes began as Constep Industries back in 1962. Their first line of height increasing shoes was introduced in 1995. Today, these shoes are far and away their most popular and best selling shoes. Designed solely for men, any pair of Increasing Shoes can increase a man's height by 2" to 5.5."

Their shoes are made from the highest quality leather and every pair is stylish, comfortable and marketed at a reasonable price, particularly now that shoppers can take advantage of their new sales promotion.

Visitors to the Increasing Shoes website will find a tremendous variety of styles and shoe types, from classic dress shoes to knock-around shoe-boots and slip-ons. And what's even more important, these shoes will increase your height and physical appearance without anyone else knowing your secret.

About Increasing Shoes: Increasing Shoes, based in Sarasota, Florida, manufacture and sell the highest quality height increasing shoes in the industry. The company has been a leader in the shoe manufacturing and sales business since 1962. Their first elevator shoes were added in 1995 and these are now the most popular shoes in their product line. Their website was launched in 2002, which made the entire sales process faster, safer and more convenient. Flexibility, reasonable prices, reliable quality, good workmanship and prompt delivery are the principles of their business.
