# Haypi Monster Version 1.5 Has Hit the Apple App Store

*Haypi Co., Ltd. has released a new update of their famous MMORPG, Haypi Monster for iOS.*

SHANGHAI, SHANGHAI, CHINA, October 31, 2013 /EINPresswire.com/ -- Haypi Co., Ltd. has released a new update of their famous MMORPG, Haypi Monster for iOS. Version 1.5 which has many new features and will significantly change the game play.

Haypi Monster's storyline will continue with two more scenes - The Thorny Forest and the Ocean Abyss. The Thorny Forest is surrounded by a light fog all year long. All the plants there have an unusual vitality. However, dangerous monsters hide there. Only the brave can capture and tame them. The Ocean Abyss is a place in which no sunlight is able to find its way into the darkness. Only the faint light from some illuminant creatures show traces of life. When monster trainers complete certain challenges, they will get special newly-introduced legendary monsters. After completing the veteran challenges of the Ocean Abyss scene, players will be awarded with Bolt, a powerful electric dragon. After victories throughout all the expert challenges in the Ocean Abyss, players will receive Sphierx - a magic lion with

unbelievable power.

In addition, the new version of Haypi Monster has a new mysterious dragon: Devil whom will be hiding throughout the lands. It will be a great challenge for all monster trainers who try catching it. Players may encounter Devil randomly through their challenges in Stone Vault all the way to Thorny Forest. Devil is a mighty monster and its appearance in Haypi Monster is a new key feature in the game.

Two other monsters - Whalorn and Faerivy will be hiding in magic caves within the new scenes. Faerivy, who looks like a fairy, lives in the Thorny Forest and can be captured in the secret cave. Whalorn, who looks like an enchanted whale, resides in the Ocean Abyss, it is also obtainable by capturing it with seal cards. Players may find those magic caves while they venture through the correspondent scenes.

To celebrate the release of the new update, Haypi is organizing a special Magic egg activity. Two extraordinarily powerful monsters, Pegasus and Bahamut, will be hidden together in Magic Eggs, so they can be obtained at the same time! What's more, the odds of getting legendary monsters will be doubled temporarily within the activity. Isn't that a real treat?
􀀀􀀀
Haypi will also introduce two new weather effects in the system - Night and Magic Storm. Night is a dream time for most of the monsters. However, it is also a perfect time for hunters and their enemies are most vulnerable during their sleep. When a storm of magic comes along, the magical power will surround everything. So monsters' psychic power will become stronger. Simple physical attacks may not work out the best during a Magic Storm.

With the new version 1.5 a Stat Bet system has been introduced. It will allow players to enhance the monster stats in exchange for some money or essence of life.

New mystery talents have also been introduced - i.e. Favor and Malicious. Favor randomly increases one of the monsters' stats at the beginning of each turn. If a monster has the mystery talent Malicious, there is a chance that the attacker will be poisoned, when damage is dealt to the player's monster. Severe poisoning occurs when this skill stacks.

There is another piece of good news - the Requirement of PVP(monthly) for purchasing the powerful spider-like skeletal Vertedeath has been lowered significantly - to 2000 points, and purchasing the cute but mighty Splashy - to 2200 points.

Haypi Monster 1.5 is completely free for download at the AppStore. Have you collected all the monsters that you want?
