# Nexcopy Adds New Standalone SD Duplicators With SD Card Sanitization Features

New Nexcopy stand-alone SD duplicators offer lightening fast binary copy speeds in addition sanitization features for wiping clean Secure Digital memory cards.

LAKE FOREST, CALIFORNIA, USA, November 5, 2013 /EINPresswire.com/ -- Nexcopy Inc., a leading manufacturer and developer of flash memory duplicators, introduces two new standalone SD Duplicator models to Nexcopy's line of flash memory duplicators and sanitizers. The 1-15 and 1-31 target systems offer unparalleled copy speeds to Secure Digital media with additional functions for device sanitization.

Stand-alone SD Duplicator by Nexcopy

Sanitization features available by the new Nexcopy SD Duplicators include full binary overwrite feature in both single pass and triple pass random write sequencing. The proprietary triple pass overwrite method developed by Nexcopy insures all data of a secure digital card cannot be recovered or restored through forensic process.

“

Pivoting from our core binary copy firmware, Nexcopy expands our technology to include sanitization features now being sought by IT professionals.”

Greg Morris, Nexcopy Inc., President

These new standalone SD duplicators by Nexcopy Corporation can sanitize multiple devices simultaneously saving IT professionals valuable time in flash memory management. Core functions of these new systems include the binary copy process used in the popular Nexcopy USB duplicators systems. Binary copy modes include the ability to copy bootable SD media, FAT, FAT32, NTFS, ext2, ext3, ext4 and any other file format system, proprietary or public.

"Pivoting from our core binary copy firmware, Nexcopy expands our technology to include

sanitization features now being sought by IT professionals," says Greg Morris, Nexcopy Inc. President. "It is important for Nexcopy to listen to the requests of our customers and act upon them to bring the best product to market."

The Nexcopy SD duplicators operate as stand-alone devices where a host computer is not required to perform the bit-by-bit duplication or the binary sanitization processes. The simple one-button operation of these advanced duplicators are ideal for IT departments, fulfillment houses, flash memory manufacturers, business, software developers and government agencies.

There are two stand-alone SD duplicator models:
Part Number: USB115SA - 1-15 target SD duplicator and sanitizer, 110 - 220
Part Number: USB131SA - 1-31 target SD duplicator and sanitizer, 110 - 220
