

CasinoWebScripts Gaming Provider Focuses on Creating Asian Casino Games

CasinoWebScripts gaming provider succeeded in taking a stand in the evolution of online gaming by launching an impressive selection of Asian casino games.

BUCHAREST, BUCHAREST, ROMANIA, November 10, 2013 /EINPresswire.com/ --

[CasinoWebScripts](#), a leading online [gaming provider](#), has once again succeeded in taking a stand in the evolution of online gaming by launching an impressive selection of [Asian casino games](#) with exciting graphics and smooth gameplay, inspired from the culture of the Orient.

In an interview given to a local newspaper, a spokesman for CasinoWebScripts related: "We have already developed a significant amount of games to cover the most popular gaming categories, while maintaining our top level quality. All our titles have graphics of the finest quality and offer the ultimate gaming experience due to their wide range of features which include freespins, bonus stages, progressive-jackpot and expanding wild animations. Our table games come with dynamic table color and dynamic zoom level so that the perfect view can be set for each screen and for every player's taste, delivering an excellent gaming experience. It is now time to focus on other gambling markets, such as Asia. Soon we will finish releasing more games inspired from various countries of this enchanting continent."

Thanks to its growing popularity among Asian operators, CasinoWebScripts has recently started to focus more towards creating casino games inspired by the Asian culture. It seems that this hard-working gaming company is not only targeting classic games played by Americans and Europeans, but also more specific games played only in the Asian continent. "Sic-Bo" is one of the most popular Asian casino games, which brings to life the finest elements of the ancient Chinese architecture. This title is combining entertainment, utility and attractiveness, in both single and multiplayer mode. "Fish, Prawn, Crab", an arcade dice game for the connoisseurs, is similar to Crown and Anchor and is derived from the classic Sic-Bo. The six sides of the dice show animal symbols instead of the classic six pips, making it deliver a unique gameplay experience. "Legend of the Thunder Monkeys" is one of the captivating Asian casino games available from CasinoWebScripts, filled with fantasy and adventure. It presents the story of six legendary Chinese monkeys that compete for supremacy in a race towards the top of the world. Other Asian casino games like "Fan Tan", "Open Face Chinese Poker" or "Dragon Tiger" are also expected to be seen at CasinoWebScripts' online store in the near future.

Besides the impressive collection of table and arcade games, CasinoWebScripts did not neglect

the development of slots. The leading gaming provider added to its collection titles such as: "Egypt Quest", an Asian casino game that became very popular in Taiwan, "Chinese Zodiac" and "Rise of the Geisha". Furthermore, it was announced that the development of other engaging slots has already been started.

CasinoWebScripts continues to amaze the online gaming market with its Asian casino games and its no-monthly fees policy, the company offering custom development and over 130 entertaining titles to choose from, which are suitable for any operator's taste and budget.
