

Stainless Steel Bird Spikes Keep Pest Birds and Their Diseases Away

Stainless Steel Bird Spikes offered by Bird-B-Gone can keep pest birds away from homes and business.

IRVINE, CA, UNITED STATES, December 9, 2013 /EINPresswire.com/ -- [Stainless Steel Bird Spikes](#) offered by Bird-B-Gone can keep pest birds away from homes and business. The anti-perching, anti-roosting bird deterrents won't allow larger birds—like pigeons, crows and gulls—to land on or near them. By doing so, they can prevent the accumulation of bird droppings, which have been known to carry any of 60 known diseases like salmonella and histoplasmosis (which can cause respiratory problems).

Pest birds can also inflict extensive damage on signs, windowsills, roofs, light fixtures, awnings and canopies. Unless they are promptly removed, bird droppings can quickly deface and permanently mar paint, fabric, plastic, metal and even stonework. Bird nesting debris has caused many fires, since the dried materials make excellent kindling. These materials can also block AC fans, vents and chimneys.

“

Our stainless steel bird spikes offer the longest guarantee in the industry - 10-years!”

Ian Rowsby, Director of Sales

Stainless steel bird spikes have successfully proven

themselves to deter any bird pest. The [spiked strips](#) are available in two-foot sections, with up to 40 spikes per foot in a linear array. To provide increasingly wider areas of pest bird deterrence, buyers can choose from three different widths —3-, 5- and 8-inch. Because the base of each spiked strip is just 1.5 inches wide, it can be readily installed on very narrow surfaces—like posts, signs and fencing. A built-in glue tough and pre-drilled mounting holes allow for fast, easy installation. The spiked strips can be affixed to any surface using commercially available glues, screws or tie downs. A flexible base—which bends a full 360 degrees—allows the spiked strip to easily follow a variety of curved exterior surfaces. For those concerned about appearance, bird

spikes provide an aesthetically pleasing way to deter pest birds.

Bird-B-Gone Stainless Steel Bird Spikes feature a patented “bend and crush” design, which keeps the spikes embedded in an unbreakable UV-protected polycarbonate base. This ensures that the spikes will last for years through harsh outdoor weather. The spikes are blunted at the tips, so they won’t injure pest birds, pets or people. They have been approved by a number of humane groups—including the U.S. Humane Society, as well as by the GSA. Each bird spike is manufactured in the USA and comes with a 10-year guarantee.

Bird-B-Gone is the world’s largest manufacturer and distributor of [bird control products](#), including world-proven bird spikes. The company provides effective and humane solutions to the problem of pest birds, ensuring a bird-free environment.
