can obtain the Setanic Scroll by passing all expert mode challenges. The legendary monster Arctica also needs to be acquired through synthesis, but the magic scroll can only drop in the newly-started World Boss activity. Players are very excited that the legendary Arctica, Hippogon, Setanic, and Leviathan will make their appearance in the game. The scroll for a new epic monster, Lycaon, can also drop in World Boss. No matter the rarity of the monsters, they are amazingly cute and powerful. And now the players can use the monster images to customize their profiles. Isn't that awesome? This is one of the cool features that have been added in The Lost Tower 1.1. Another new feature is the Radar diagram display which has been added to the encyclopedia. Monsters' stats are now laid out in a way that is easier to understand.

Haypi Monster is completely free for download at the AppStore and offers in-app purchases. It can entertain everyone at every age and from any walks of life.
