

Skyline's WindScape™ is The Perfect Trade Show Display For Chicago Events as It Is Overseas

Skyline WindScape™ trade show displays have proven to be a smart investment for international exhibitors.

LOMBARD, IL, USA, December 11, 2013

/EINPresswire.com/ -- International [exhibiting just got easier](#) thanks to the Skyline WindScape™ line of trade show displays in Chicago. This innovative new inflatable exhibiting system is ideal for traveling and international conventions. It requires no tools to set up, comes with a convenient carry-on sized packing case and is available in many different shapes and sizes. European power adapters are even available for the battery-powered air pump so it can be recharged at the end of every day.

The inflatable systems are portable and easy to ship, making the line a best-seller among trade show booths in Chicago.

"Skyline WindScape™ is the perfect solution for those who exhibit overseas. It's lightweight and easy to transport. It can be carried on to planes or shipped ahead of time at far less cost than traditional exhibits. The displays assemble with the push of a button, which eliminates the need to pay installers to set up and tear down the exhibit. The system saves exhibitors money at every turn and is easy to carry with you when you're traveling whether that is from show to show or country to country," said [Ken Buckman](#), CEO and Founder of TradeTec Skyline (www.ttskylinewindscape.com).

“

Skyline WindScape™ is the perfect solution for those who exhibit overseas.”

Ken Buckman

The system's 46 different components make WindScape™ a fully customizable trade show solution. TradeTec Skyline is an exclusive carrier of Skyline WindScape™ that can design a WindScape™ trade show exhibit for their Chicago based clients perfect for their needs and budget. Custom fabric graphics are included with every WindScape™ display. Additional graphics can be ordered to convey a new message or give the display an updated look.

WindScape™ further maximizes versatility with carrying cases that convert into tables and reception counters or to act as storage space for brochures and literature, supplies and

electronics during the convention. The cases can even be branded with company graphics to coordinate with the exhibit. The 3m back walls are available in several different shapes allowing exhibitors to create semi-private meeting rooms and seating areas, all of which comply with international regulations.

"International venues have different space configurations than within the U.S. WindScape™ can fit into those parameters with ease. A small 3-meter or 10-foot solution, for example, fits perfectly into a staged Pavilion or the linear space common at international exhibitions. Flat walls, curved walls, hanging displays, towers, island exhibits, WindScape™ has it all," noted Buckman.
