

Harnessing modern Technologies to Provide Advanced Therapeutic Solutions to the Dermatological Challenges

4th International Conference on Clinical & Experimental Dermatology during April 14-16, 2014 San Antonio, USA

LOS ANGELES, CA, USA, January 13, 2014 /EINPresswire.com/ -- Psoriasis, Acne, Spots, Leprosy, Eczema and Leucoderma are only few dermatological challenges to mention as the intensified skin related diseases are emerging in the modern world due to stress, pollution, poor diet and psychological pressures. The latest therapeutic solutions available

thanks to the technological advancements need to be propagated across the practitioners of the globe to get the best out of it.

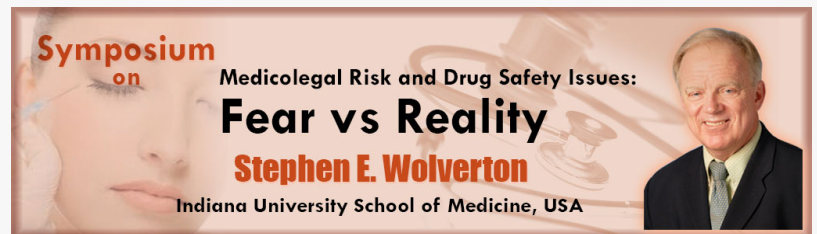

With an aim to spread the latest research outcomes in the dermatological therapies, [OMICS Group International](#) has scheduled the 4th International Conference on [Clinical & Experimental Dermatology](#) during April 14-16, 2014 San Antonio, USA with a theme “Advanced Therapeutic and Modern Dermatological Technologies”.
