

Vigilant Software announces free webinar: Conducting an information security risk assessment with vsRisk 2.0

ELY, UK, January 13, 2014 /EINPresswire.com/ -- [Vigilant Software](#), the specialist ISO 27001 information security risk assessment and management software provider, has announced a free webinar on 23 January 2014: Conducting an information security risk assessment with vsRisk™2.0. For more information and to register, visit: www.vigilantsoftware.co.uk/webinars.aspx.

Vigilant Software has just launched an upgrade to its best-selling vsRisk™ tool which dramatically reduces the time spent to perform an ISO 27001-compliant information security risk assessment.

The all-new vsRisk v2.0 features a range of new enhancements including three control sets to choose from (for both ISO/IEC 27001:2005 and ISO/IEC 27001:2013, as well as cyber security control sets from ISO 27032) in addition to a simple and crisp new user interface. This sophisticated software empowers the risk assessor to conduct a risk assessment in a fast and seamless manner.

Alan Calder, Chief Executive of Vigilant Software, says: "Improving on the features of the previous version, the new version 2 will help cut the time spent on manual risk assessments to over 70%."

The information security [risk assessment webinar](#) will provide a live demonstration on the new features of vsRisk. Attendees are advised to download the 15-day free trial in advance in order to familiarise themselves with the software before the webinar begins.

Register for the webinar today here: www.vigilantsoftware.co.uk/webinars.aspx
