

Blue-Pencil Earns NAID's AAA Certification for Plant-Based Shredding

Blue-Pencil earns National Association for Information Destruction's AAA Certification for Plant-Based Shredding

OAKVILLE, ONTARIO, CANADA, January 31, 2014 /EINPresswire.com/ -- Blue-Pencil Information Security of Oakville, Ontario is proud to announce it has recently been awarded the National Association for Information Destruction's (NAID) AAA certification for plant-based shredding. Certified December 10, 2013, the NAID AAA certification program was developed by information security professionals and is recognized by thousands of private and governmental organizations from around the world.

"Our on-going NAID compliance ensures that Blue-Pencil securely and responsibly handles, transports and stores materials prior to destruction, as well as destroys and disposes your confidential documents, materials and media, securely and responsibly. By completing NAID's [plant-based certification](#) process, auditors have verified that Blue-Pencil's procedures and protocols are correctly in place to ensure the secure handling of confidential materials through all stages of the destruction process," says Mario Skopek, President of Blue-Pencil.

NAID offers its voluntary AAA certification program to member companies who provide information destruction services. Through this program, NAID members are submitted to a regimented, comprehensive unannounced audit program for all plant-based and/or mobile operations which handle paper or printed media, micromedia, computer hard drive destruction, and/or computer hard drive sanitation.

"Receiving a plant-based certification is an important step for Blue-Pencil. We've been NAID mobile shredding certified for over six years and this new plant-based certification will now allow Blue-Pencil to offer an additional shredding solution to our valued customers," continues Mario.

Established in 2004, Blue-Pencil is the leader of secure document storage, records management, document scanning, imaging services and secure shredding. Privately held and Canadian, Blue-Pencil actively serves more than 15,000 organizations including small and medium-sized businesses as well as Fortune 500 companies. Blue-Pencil is a customer centric company that offers a full circle of document storage, archiving and destruction solutions that are unparalleled in service and value.

As an environmentally conscious company, Blue-Pencil not only contributes to total document, media and/or product security, but greatly contributes to the protection of the environment. Their Paper Shredding Tree Saving Program has saved approximately 250,000 trees with all shredded material processed into recycled paper products or converted in to energy.
