“

A home should be more than just a collection of spaces that one needs, it should offer those special touches that we all want to surround ourselves with. .”

Sandra Muller

“The Flemington was built with versatility in mind. Ideal for the first home buyer, couples just starting out, or even growing families, this gorgeous property combines innovative design with all the utility a homeowner could ask for. The seamless integration of the common areas and the overall free-form design gives The Flemington an open and airy feel that's perfectly suited for Western Australia living,” said Sandra Muller of Easystart Homes

(<http://www.easystarthomes.com.au/>).

The Flemington features an open concept kitchen/living/dining area that opens into a stunning

outdoor alfresco, perfectly suited for entertaining or family activities. The home's master suite includes a designer en-suite and oversized walk-in wardrobe. The other two bedrooms are located on either side of the home's second bathroom, creating a perfect children's area or guest retreat.

Designed to offer contemporary living at its best, The Flemington also features a charming veranda, spacious two-car garage, and a separately zoned home theatre room.

"A home should be more than just a collection of spaces that one needs, it should offer those special touches that we all want to surround ourselves with. We designed The Flemington to appeal to a wide range of homeowners, so it was important to include spaces like the home theatre and indoor/outdoor areas in the form of the alfresco and veranda that have multiple uses and give homeowners the opportunity to personalise the property to suit their specific needs," Muller said.
