

FieldOne Earns 'Certified For Microsoft Dynamics' Distinction For Field Service Management Solutions

FieldOne Sky meets Microsoft's highest standards of software quality, compatibility and successful use by existing customers.

MAHWAH, NJ, USA, February 27, 2014 /

EINPresswire.com/ -- FieldOne Systems LLC announced

today that [FieldOne Sky](#), its cloud-based field management service solution, is now Certified for Microsoft Dynamics CRM, which signifies that the solution has met Microsoft's highest standard for partner-developed software. By successfully meeting all certification requirements, FieldOne Sky can now carry the exclusive "Certified for Microsoft Dynamics" logo.

“

This certification validates the investment we have made in development for Microsoft Dynamics CRM.”

Shloma Baum

FieldOne Sky is an agile, end-to-end software platform supporting all phases of Field Service Management (FSM). The solution incorporates state-of-the-art routing and scheduling functionality, advanced work process automation, flexible communication capabilities, and robust reporting and business intelligence features. FieldOne Sky features an open architecture for simplified

[integration](#), flexible deployment options, [native apps](#) for all major mobile platforms and no-code customization driving rapid implementation and fast ROI.

Solutions that are Certified for Microsoft Dynamics have demonstrated development quality and compatibility with the Microsoft Dynamics product on which they run by passing rigorous software testing for Microsoft Dynamics performed by VeriTest (a service of Lionbridge). In addition, the Microsoft Dynamics partner must have customers who are successfully using the certified solution and are willing to recommend it.

For customers, Certified for Microsoft Dynamics helps identify Microsoft Dynamics solutions that have been tested for compatibility, meet high quality standards, and are successfully used by existing customers. This certification represents a significant step in elevating the standard for partner-developed software solutions. By highlighting these solutions, Microsoft also creates new opportunities for partners to expand their reseller channel and to better promote their

packaged Microsoft Dynamics solution for customers.

"In an ever-changing economic environment, organizations need to be equipped with the best CRM solution to help them succeed," said Bob Stutz, vice president, Microsoft Dynamics CRM. "By passing this rigorous testing and attaining all of the necessary milestones for the CfMD logo, FieldOne is prepared to offer our customers a CRM solution to help them compete in their market."

"This certification validates the investment we have made in development for Microsoft Dynamics CRM," said Shloma Baum, President and Chief Technology Officer. "Having achieved the CfMD distinction for CRM Online as well as the on-premise version, it shows that we positioned to adapt to the changing Dynamics space – and can ensure a seamless user experience for our customers as Microsoft continues to add new features and functionality. Most of all, this greatly expands the opportunity for us to sell our solutions to Microsoft enterprise customers as well as the broader enterprise market."

About FieldOne Systems

FieldOne Systems provides state-of-the-art software and services addressing the complex challenges customers face in managing enterprise field service organizations. Their software enables companies to provide the most customer-centric and profitable field service possible. They recognized that the disruption driven by Mobility, Cloud, and Big Data required a revolutionary solution designed to harness the capabilities of these technologies and launched FieldOne Sky - the agile platform for intelligent enterprise field service management. Sky provides the most comprehensive feature set, an open architecture for simplified integration, flexible deployment options, and on-demand configuration. These combined elements drive rapid implementation, maximum adaptability, and the fastest ROI in the industry. FieldOne's technology is driving the success of diverse enterprises across a wide cross-section of industries.
