

Security System Provider Says That Most Commercial Businesses Can Benefit From Modern Security Camera Monitoring Systems

Hy Haddad, president and founder of HDH Intelligent Technologies, says that security should be a top priority for any business owner

NEW YORK, NY, UNITED STATES, February 28, 2014 /EINPresswire.com/ -- Many small and mid-sized businesses already have a basic video surveillance system that records the daily activities at their business, says Hy Haddad, president and founder of HDH Intelligent Technologies (<http://www.hdhtech.com>). These systems are good, he says, because, in the event of a robbery or an accident, it may help catch the perpetrator or determined what happened, but many existing technologies are out-of-date and businesses should consider upgrading their security systems for increased peace of mind.

“[megapixel video surveillance](#) security systems can do so much more than just capture the action at your business,” Haddad says. “Many modern [video surveillance systems](#) now allow business owners to keep an eye on their business in real time.”

When a business owner installs a modern security surveillance system they not only increase the overall security of their business, but the installation of a quality surveillance system has also been shown increase worker productivity, according to Haddad.

“A good modern surveillance system is a really good idea for any business and, the truth is, it offers so much more than most people expect,” says Haddad. “In addition to security, a good surveillance

HDH Tech

system can help resolve employee disputes and even help prevent false claims by employees and customers. The possibilities are endless.”

According to Haddad, some of the features offered by modern day security systems include continuous real-time monitoring, as well as digital storage features, making video easily accessible to authorized users, anywhere and at any time.

“The use of [high quality ip camera](#) surveillance systems to monitor and record activity in and around your business environment is an unfortunate, but very necessary reality, particularly in this day and age,” explains Haddad. “At HDH Technologies, we offer top-of-the-line video surveillance systems meant to heighten security at the business you worked so hard to create and give you

real-time access to what’s going on when you are away.”

Moreover, Haddad says he practices what he preaches. Just recently his business was recently burglarized and thanks to the state-of-the-art security system he installed, one of the same systems he installs for his customers, the police were quickly able to apprehend the thief.

“

A good modern surveillance system is a really good idea for any business and, the truth is, it offers so much more than most people expect,

Hy Hadad

“My IP HD cameras gave me a clear image of the guy and what he was wearing,” Haddad says. “I called the cops, they recognized the suspect, issued a warrant, and had him in custody that same day. In my 25 years of installing analog cameras, we rarely caught suspects. With the new security camera technologies available today, we catch them every time.”

HDH Intelligent Technologies, based in Brooklyn, NY, is a provider and custom installer of home electronic and integration technologies. HDH serves both commercial and residential customers by providing lighting control systems, security & CCTV, audio/video, telephone systems, home theaters, and HVAC control & automation. Serving the entire tri-state area, no job is too big or too small for the HDH staff, from hanging a plasma display on a wall, to installing a full automation and control system. For more information, visit the HDH website (<http://www.hdhtech.com>) or call, 1-888-449-4233.
