

IT Governance's new Gap Analysis Tool makes the transition from ISO 27001:2005 to 2013 much easier

IT Governance Publishing have released an ISO/IEC 27001:2005 to 2013 Gap Analysis Tool that helps organisations make the transition from ISO27001: 2005 to 2013

ELY, UK, March 10, 2014 /EINPresswire.com/ -- IT Governance, is excited to announce that its niche IT-GRC publishing imprint, ITGP, have released an ISO/IEC 27001:2005 to 2013 Gap Analysis Tool that helps organisations make the transition from ISO27001: 2005 to 2013 much more easily.

ISO27001: 2013 is perceived as more flexible and business-friendly than the earlier, 2005, version of the standard. Even so, moving from one version of a standard to another still involves a good deal of work, which is where this new Gap Analysis tool becomes beneficial.

The ISO/IEC 27001:2005 to 2013 Gap Analysis Tool enables organisations that are compliant with ISO/IEC 27001:2005 to identify where they need to make changes, implement new procedures, or phase-out previous controls so that they meet the requirements of ISO/IEC 27001:2013.

The tool is attractively priced at just £49.95 and is a valuable resource for anyone tasked with transitioning to ISO/IEC 27001:2013.

Those looking for a more comprehensive guidance and a full set of ISO/IEC 27001:2013 policy and procedure templates, should consider using the ISO27001 2013 ISMS Standalone Documentation Toolkit.
