

5th Annual Ethernet Technology Summit Announces Record Registration

April 30 - May 1, 2014 in Santa Clara, California

SANTA CLARA, CA, USA, March 21, 2014 /EINPresswire.com/ -- Conference Concepts is pleased to announce that registration for the 5th annual [Ethernet Technology Summit](#) (ETS) to be held April

“

The 2013 ETS event had over 940 registrants and I project the 2014 event to have over 1200.”

Lance Leventhal

29-May 1 at the Santa Clara Convention Center has early attendee projections above 30% over last year's event, which also gained 30% in registration. The Ethernet Technology Summit is the only conference focused solely on the Ethernet market. ETS brings together fellow Ethernet technology users, partners, designers and industry luminaries to learn how to empower the modern infrastructure and gain a competitive edge. Attendees will

learn strategies during three days packed full of seminars, keynotes, sessions and forums on the latest in Ethernet innovation including 40/100/400 GbE, convergence, data centers, Internet-of-Things (IoT), and storage over Ethernet.

“The 2013 ETS event had over 940 registrants and I project the 2014 event to have over 1200”, said Lance Leventhal, ETS Program Chairperson. “We are delighted to see this growth and look forward to connecting with all the participants at the event.”

The Ethernet Technology Summit will feature keynotes from Cisco, Dell, Microsoft, Comcast Business Services, the Dell'Oro Group and the Ethernet Alliance. Other key sessions include a VC Forum, a market research session with major industry analysts, the popular Beer Pizza session with access to experts on a one-on-one informal basis, and all-day seminars on open-source switching and high frequency communications design (40/100/400 Gb).

About the Ethernet Technology Summit

Ethernet Technology Summit focuses on the use of Ethernet throughout the networking space. This covers the emergence of 40-Gigabit and 100-Gigabit Ethernet standards and standards efforts beyond 100GbE. Furthermore, it includes the use of Ethernet in data centers, storage, and converged networks. Other topics of interest include Open Ethernet, Ethernet and SDN, and high-speed test equipment. The Summit offers keynotes, seminars, forums, tutorials, an expert table session, exhibits, and receptions with the aim of presenting expert speakers and encouraging networking and the flow of information.
