

# IT Governance introduces 20% discount on vsRisk™ – the information security risk assessment tool

*IT Governance Ltd has announced a 20% discount on the current price of vsRisk™ – the definitive ISO 27001-compliant information security risk assessment tool.*

ELY, UK, March 25, 2014 /EINPresswire.com/ -- IT Governance Ltd, the single source provider of information security and ISO 27001 products and services, has announced a 20 % discount on the current price of vsRisk™ – the definitive ISO 27001-compliant information security risk assessment tool. The discount is applicable to vsRisk licences purchased before 28 March 2014. These include:

- [vsRisk Standalone](#)
- [vsRisk Multi-user](#)
- [vsRisk Network](#)

Conducting a risk assessment is a key requirement of ISO 27001:2013. Selecting an adequate risk methodology is essential for ensuring compliance with the standard. Risk assessors often face the challenge of deciding how granular their assessment should be, how to assign risk ownership and conducting reporting.

vsRisk delivers a simplified and more intuitive risk assessment process, and also reduces the time spent to perform an ISO 27001-compliant information security risk assessment. It is also designed to make compliance with ISO 27001, the information security management standard, easy.

A survey by Vigilant Software, the company that has developed vsRisk, found that more than 63% of the respondents cited facilitating ISO 27001-compliance as the most important feature of the tool. Approximately 57% of the respondents were of the opinion that automated reporting was also a considerable benefit. Other benefits of this software product that were found important, as compared to manual spreadsheets, were the ease and speed of using the tool, as well as the searchable, built-in database of threats and vulnerabilities.

vsRisk is available in three options: Standalone, Network-enabled and Multi-user. Annual upgrade and support packages are also available. Customers who purchase the product before 28 March 2014 will receive 20% discount.

More information on the various vsRisk versions is available here:
