

# Highbank receives Mines Act permit for Swamp Point North Aggregate Project

*Highbank Resources Ltd. news release dated March 19, 2014, the company has received the Mines Act permit which authorizes sand and gravel extraction activities*

VANCOUVER, B.C., CANADA, March 26, 2014 /EINPresswire.com/ -- Victor Bryant, president and chief executive officer, commented: "We are very pleased that we have reached another milestone in the development of the Swamp Point North aggregate project. From the initial signing of an earn-in agreement with Portland Canal Aggregates Corp. in 2003; preliminary testing -- seismic surveying, road building, site preparation, sonic drilling and airborne surveying in 2005 and 2006; through to defining the deposit in a National Instrument 43-101 technical report in November, 2007; and completing the earn in of a 100-per-cent working ownership interest in 2008; the company has persevered."

Mr. Bryant further commented: "Bringing a mining property from its discovery through to a permitted operation is an achievement that involves a partnership with government, first nations, local stakeholders, consultants and the investment community. We wish to wholeheartedly thank all those who have contributed to our mutual success. We look forward to moving to production, supporting job creation, and providing opportunities for growth in the Pacific Northwest, and throughout British Columbia."
