

Tusa Consulting Services adds Mr. James Szalajeski to its consulting and project implementation staff

COVINGTON, LA, USA, April 8, 2014 /EINPresswire.com/ -- Tusa Consulting Services, a designer of [public safety radio](#) systems, has announced the addition of Mr. James (Jim) Szalajeski to its consulting and project implementation staff.

Prior to joining Tusa, Mr. Szalajeski was employed as a [radio engineer](#) for Sytech Corporation, a manufacturer of interoperable radio gateway solutions. Mr. Szalajeski was then involved in the design of various radio interfaces for Sytech's gateway product line and participated in the implementation of over 160 gateways throughout fixed 911 centers and mobile command vehicles throughout Virginia and other states. Mr. Szalajeski was previously employed by Radiophone and Verizon as a cellular site developer responsible for the design and installation of cellular towers, shelters and standby power systems.

Mr. Szalajeski is based in Covington, Louisiana where he will be supporting public safety communications projects throughout Florida, Georgia, Mississippi and Louisiana. Jim's 40-year career in public safety land mobile and cellular radio services further expands Tusa's capability of ensuring vendor technical compliance, workmanship quality and on-time project completions.

About Tusa Consulting Services

Tusa Consulting Services was founded by Dominic (Nick) Tusa in 1992. At that time, Tusa provided contract radio engineering services for professional consulting firms such as Moses Engineers (New Orleans); RCC Consultants (Woodbridge, NJ) and Dorsey-Pages, LLC. Additionally, Tusa independently undertook microwave and radio communications projects for Exxon Company, USA; the City of Kansas City, Missouri and others.

By 2002, Tusa had begun its transition from providing technical services to other consulting firms and focused on developing a wholly-independent private practice. By late 2004, Tusa had initiated its plan for structured expansion through equity partnerships and had selected its first partner, Gilbert Stock. Coincident with Stock's addition, the firm's official name was changed to Tusa Consulting Services II, LLC (or TCS).

Today, TCS has consultants located in Louisiana, Texas, Pennsylvania, Missouri, Florida and Georgia. Our vision is to be recognized as the best in the nation at designing and providing implementation oversight of life-critical, [hardened radio networks](#). Every step we take, whether in the expansion of our firm into other states, the addition of consultant personnel or through the development of new customer services, is geared toward providing only the highest quality response, care and attention to client needs.
