RAVN Systems revolutionises COWI's SharePoint 2013 Search.

COWI has deployed RAVN Connect for Microsoft SharePoint 2013 to enhance their Microsoft SharePoint 2013 Search solution.

LONDON, LONDON, UNITED KINGDOM, May 12, 2014 /EINPresswire.com/ -- RAVN Systems, experts in Enterprise Search, Unstructured Big Data analytics and Knowledge Management solutions, announced today that COWI, a leading international consulting group with 50 remote locations, specialising in engineering, environmental science and economics, has deployed RAVN Connect for Microsoft SharePoint 2013 to enhance their Microsoft SharePoint 2013 Search solution.

By deploying RAVN Connect for SharePoint 2013 at all COWI's 50 offices they are now able to connect SharePoint into the broader non-Microsoft ecosystem, safely, securely and cost effectively. Supporting their distributed architecture model, COWI now have true Enterprise Search with seamless discoverability and access to their content.
In representative tests across their estate COWI have achieved a 57% reduction in indexing time of remote content, over 90% reduction in bandwidth usage during indexing and 70% reduction in time to preview compared with opening content. They have also estimated a saving of 12 physical servers.
Frederik Bonde Lykke Nielsen, Senior IT Manager, COWI, stated: "RAVN Connect revolutionises SharePoint Search in distributed environments".
