

Surface Shields Showcases Surface Protection Products, Including Carpet Shield, at 2014 AIA Show

ORLAND PARK, IL, USA, May 13, 2014 /EINPresswire.com/ -- [Surface Shields](#), a manufacturer of hard surface and carpet protection products, is exhibiting at the 2014 AIA Show in June. The company provides a variety of options in surface protection for construction jobs including plastic carpet protector.

ORLAND PARK, IL -- Surface Shields, a Chicago-area manufacturer of hard surface and carpet protection products, will be showcasing some of their products at the 2014 American Institute of Architects (AIA) convention in Chicago. The company will be located at Booth #4209 on the expo floor during the show, which runs from June 26-28. Featured products include: Builder Board, [Carpet Shield](#), Cover Shield and adhesive tapes. The booth will be staffed by Marketing and Creative Director, [Seth Geiss](#), Sales Director, Tom Fergus and Sales Representative, Jim Jarog.

"This is the first time we are exhibiting at the AIA convention. We're looking forward to connecting with architects and building an understanding of their goals, obstacles and requirements when specifying products. The information we receive will help us develop new products to meet those needs. This will allow us to remain the top single source supplier for surface protection, dust containment and tape products," said Seth Geiss, Marketing and Creative Director at Surface Shields (www.surfaceshields.com).

The building and construction products that Surface Shields will be highlighting are:

- Builder Board is the most durable paper board on the market today and replaces the need for sheets of Masonite that typically used to provide surface protection for construction sites.
- Carpet Shield provides temporary carpet protection in the form of a clear, self-adhering protective film. The non-slip plastic carpet protector is highly resistant to tears and punctures. This makes it an ideal surface protector not only in construction but also during remodeling, moving and painting.
- Cover Shield provides flame retardant protection of surfaces in a variety of industries and applications ranging from industrial and medical to construction and military.
- Adhesive Tapes of many kinds are available from Surface Shields. These heavy-duty tapes are used to hold other products in place without damaging the underlying structure.

"This convention is a great opportunity for us to talk face-to-face with architects to answer their questions about our products and let them see and handle the products in person. It's also a good chance for us to catch up with architects we already know to see how our products worked for them and give them a heads-up on what's new and upcoming at Surface Shields," noted Geiss.

The American Institute of Architects (AIA) convention is the largest annual gathering of architects and design professionals in the United States. The convention is held annually and draws attendees from all over the world. For more information about the AIA Convention, [click here](#).
