IT Governance USA launches new and updated toolkit trials

IT Governance USA has launched their range of free toolkit trials to help businesses better adapt and adopt best management practice.

BOISE, IDAHO, USA, May 20, 2014 /EINPresswire.com/ -- IT Governance USA, the one-stop shop for cyber security, risk management, IT governance, and compliance products and services, has launched their range of free toolkit trials to help businesses better adapt and adopt best management practice.

Developed by IT Governance Publishing (ITGP), the toolkits aim to help small and medium-sized corporations quickly implement best management practice in technology governance, risk management, and compliance fields. The pre-written documentation in the toolkits has been authored by highly-qualified, industry-specific consultants to give businesses reliable documentation that can be trusted to be compliant and to work in the real world. All of IT Governance USA's toolkits are aligned with the latest industry standards and frameworks, including ISO27001:2013, ITIL® 2011, PCI DSS v3.0, ISO22301:2012, and ISO20000:2011.

Each toolkit has a fully integrated Excel dashboard, making it easy to track the overall progress of the implementation project and improving version control. Additionally, all documents can be formatted in a single click, saving time while ensuring consistency across the entire management system.

President of Moreton & Co. and previous toolkit customer, Tim Moreton, commented on his experience:

"IT Governance Ltd 'gets it'. Their toolkits are all you really need to produce documentation that upholds the integrity of ISO and puts you in an audit-ready position for SOX and PCI compliance... They deliver toolkits with easy to follow instructions and pre-written templates to help you produce documentation for your Information Security Manual."

The toolkit trials available contain sample documents which will help prospective customers understand the purpose and usability of a toolkit in their business.

Downloadable samples from popular toolkits include:

•ISO27001 2013 ISMS Standalone Documentation Toolkit: www.itgovernanceusa.com/free_trial.aspx
•PCI DSS v3.0 Compliance Toolkit: www.itgovernanceusa.com/free_trial.aspx
•ITSM, ITIL® & ISO20000 Implementation Toolkit: www.itgovernanceusa.com/free_trial.aspx
