

TransNexus Becomes Oracle PartnerNetwork Gold Level Partner

TransNexus, a developer of VoIP network management software, today announced that it has achieved Gold Partner status in Oracle PartnerNetwork (OPN).

ATLANTA, GA, USA, May 28, 2014 /EINPresswire.com/ --

TransNexus, a developer of VoIP network management software, today announced that it has achieved Gold Partner status in [Oracle PartnerNetwork](#) (OPN). By attaining Gold Level membership, Oracle has recognized TransNexus for its commitment to establish Oracle related knowledge to deliver [least cost routing](#), [telecom fraud](#) detection and in depth reporting and analysis tools for VoIP networks, and for uniquely addressing the challenges of joint customers.

Oracle Acme Packet session border controllers (SBCs) provide critical control functions to deliver high quality interactive communications—voice, video and multimedia sessions—across IP network borders. They collect data on every call that flows through a network. TransNexus solutions can enable service providers and enterprises to use that data to optimize their networks, lower costs, and prevent fraud losses.

TransNexus' SDReporter and NexOSS solutions were designed specifically to use the data collected from Oracle Acme Packet SBC to create detailed Quality of Service reporting and alarms. They also combine Least Cost Routing (LCR) and Telecom Fraud Detection features.

Jim Dalton, president of TransNexus, said: "The new level of membership with Oracle PartnerNetwork is a logical continuation of our long-term cooperation with Acme Packet. The Gold status offers us new opportunities to build interoperable solutions and enable an ideal user experience."

With its Gold status, TransNexus receives the benefit of being able to start developing specializations that will allow them to grow their business, increase their expertise, reach higher levels of customer retention, and create differentiation in the marketplace. Gold members also become eligible to resell all Oracle Technology products and can apply to resell Oracle Applications and Industry Solutions. In addition, they receive access to Oracle account representatives and My Oracle Support updates for all products, discounts on training, limited free assessment/exam vouchers, reduced rates on the purchase of Oracle licenses for internal

use, discounts on advanced customer services and more. For more information about the benefits of becoming an OPN Gold level partner, please visit:

About TransNexus

TransNexus is a software development company specializing in applications for managing VoIP networks. The features offered by TransNexus are dynamic least cost and quality of service routing, telecom fraud detection, SIP peering, number portability, profitability analysis and wholesale billing. TransNexus, founded in 1997, is located in Atlanta, Georgia and is a privately held Delaware C corporation. Learn more at <http://www.transnexus.com>.

About Oracle PartnerNetwork

Oracle PartnerNetwork (OPN) Specialized is the latest version of Oracle's partner program that provides partners with tools to better develop, sell and implement Oracle solutions. OPN Specialized offers resources to train and support specialized knowledge of Oracle products and solutions and has evolved to recognize Oracle's growing product portfolio, partner base and business opportunity. Key to the latest enhancements to OPN is the ability for partners to differentiate through Specializations. Specializations are achieved through competency development, business results, expertise and proven success. To find out more visit <http://www.oracle.com/partners>.
