ISO27001 ISMS documentation toolkit recommended by 100% of customers

The ISO27001 2013 ISMS Documentation Toolkit has been recommended by 100% of IT Governance's customers, in a survey taken over 2013-2014.

BOISE, IDAHO, USA, June 3, 2014 /EINPresswire.com/ -- The ISO27001 2013 ISMS Documentation Toolkit has been recommended by 100% of IT Governance's customers, in a survey taken over 2013-2014.

Run by IT Governance, the survey also found that 100% of previous toolkit customers said that the ISO27001 ISMS Documentation Toolkit saved them time, and 80% said that it delivered value for money.

Previous customers have said:

"Using the templates, was the only way that we could deliver a 1st edition ISMS in under 6 months."

"ITG's document templates made a significant contribution to us achieving ISO27001 1st time."

The ISO27001 2013 ISMS Documentation Toolkit provides pre-written template documents aligned to ISO27001:2013 (the internationally recognized information security Standard) to help organizations easily create and manage information security management system (ISMS) documentation.

US organizations are increasingly seeing ISO27001 as a prerequisite for doing business. This international standard helps businesses protect their information, and certification to the Standard is recognized by customers, suppliers, and stakeholders as taking appropriate action against threats to the confidentiality, integrity, and availability of their data.

ISO27001:2013 enables you to pick the controls that best suit your business and compliance requirements, and then manage them in a consistent and continuous way. This means you can tailor ISO27001 to meet the needs of your customers and integrate the standard with other frameworks and regulations (HIPAA, FISMA, etc.) to produce a comprehensive and effective solution to protect your data.

The ISO27001 2013 ISMS Documentation Toolkit is available for purchase from IT Governance USA: www.itgovernanceusa.com/shop/p-1382.aspx

Please note: additional resources are also available for those implementing ISO27001, including official standards, complementary reading material, and a risk assessment tool – all of which can be found in the No 3 Comprehensive ISO27001 2013 ISMS Toolkit: www.itgovernanceusa.com/shop/p-970.aspx
