

# Game Planner Pro Revolutionizes Football Coaching Software with Web Based Package

*Game Planner Pro releases an online football coaching game plan management software package unlike anything on the coaching market.*

GREENBELT, MD, USA, June 11, 2014 /EINPresswire.com/ -- Game planner Pro announced the release of a web based football coaching software, which is more accessible and easier to use than anything to ever hit the coaching market. The new web based version improves upon the simplicity of the older, spreadsheet version and increases communication and time saving for football coaches.

Game Planner Pro has been selling a spreadsheet based offensive football game plan creation, deployment, management and communication software program since 2008. Most commonly the software package was featured and purchased by coaches attending trade-shows and training events for football coaching. The product has been passed around a small community of offensive football coaches who have known about it. The new web based version of the product makes for increased exposure for the company which previously kept the product exclusive to trade shows and coaching events. The web based application also allows coaches to access their game planning tools from anywhere, at any time.

"Game Planner Pro has never been easier and has never been such an exceptional communication tool for football coaches than what it is now. We have always had a limited supply to sell to coaches in the past, but this makes it available to coaches everywhere. Its already moving faster than we had imagined." said company Co-Founder, Ryan Corey.

Game Planner Pro is a football coaching software which prepares game plan, practice scripts, wristbands and game day call sheet all with one single entry for a coach at the start of a week. For more information on the new web based software application, visit their website at <http://www.gameplannerpro.com>

Game Planner Pro provides football coaching software that specializes in game plan creation, deployment, management and communication.
