

# HIGH PERFORMANCE SECURITY AND ANALYSIS SOLUTION FOR BIG DATA

SUNGNAM, SOUTH KOREA, June 12, 2014 /EINPresswire.com/ -- WATCH I SYSTEM, Inc. (<http://www.watchisystem.com>), a Korean leading provider of security solution, released "Log INSIGHT2.0", a big data security and analysis solution to collect, index, and analyze log data in real time, responding to an era of explosive increase in big data.

The logo for Data PRISM, with "DATA PRISM" in a large, bold, black, sans-serif font, and "NEXT GENERATION SECURITY ANALYTICS" in a smaller, black, sans-serif font below it.

**DATA PRISM**  
NEXT GENERATION SECURITY ANALYTICS

Based on WATCH I SYSTEM's own development, [Log INSIGHT](#) uses intelligent engine technology for big data security and analysis.

It is an integrated log analysis solution to overcome limits of traditional log management solution and to meet requirement of current big data period.

Log INSIGHT has a wide range of technologies including real time management, high performance of analysis, scenario and customizing rule-based analysis, real time keyword search, conditional search with AND/OR, statistics and prediction based analysis as well as NoSQL based big data analysis and security alert/risk estimate.

One of key features illustrates a real time keyword or character search and user's own search in Log INSIGHT.

"Log INSIGHT will be marketed in Korea first and expanded to global market in accordance with our initial marketing strategy to find global partners who are willing to understand our products in depth," said Albert Choi, CEO of WATCH I SYSTEM.

Industry expects that integrated log analysis system will take a key role in security and analysis for enterprise big data. WATCH I SYSTEM plans to release upgraded version of Log INSIGHT this year actively responding to meet market's demands and technology trends.

Mr. Choi added, "we will double revenue this year with our greater product differentiation in a current market."

In addition to Log INSIGHT, WATCH SYSTEM provides "[TESLA MD](#)" and "[Data PRISM](#)" which represent a managed threat defense system and information leakage analytics system respectively.
