

Turn Heads In A Chrysler SRT8 CORE In Brisbane From Northstar Chrysler Jeep Dodge

The high-performance Chrysler 300 SRT 8 CORE is here. Test drive a Chrysler 300 SRT8 in Brisbane at Northstar Chrysler Jeep Dodge in Redcliffe.

REDCLIFFE, QLD, AUSTRALIA, June 13, 2014 /EINPresswire.com/ -- One look at the Chrysler 300 SRT8 and it's easy to see why it's billed as the Ultimate Performance Vehicle. Bold, muscular lines, fierce grille work and an aggressive stance can't help but convey a feeling of power and performance. That power and performance is just waiting to be tested at [Northstar Chrysler Jeep Dodge](#) in Redcliffe where the Chrysler 300 [SRT8 CORE](#) is available for test drives.

Powered by a racing-inspired 6.4 L HEMI V8 engine, the 300 SRT8 CORE is the most powerful and commanding Chrysler 300 ever, yet it doesn't sacrifice on safety or comfort. A heated steering wheel, Uconnect® navigation system, multistage front airbags and side-curtain airbags for front and rear outboard occupants are just a few of the features in the new Chrysler 300 SRT8 in Brisbane.

'This is a performance automobile with an executive look. It's bold, yet refined and muscular, yet sleek from the outside. Inside, the SRT8 CORE has a racing-inspired look but with plenty of luxurious touches that make driving more comfortable,' said [Bob Aldons](#) of Northstar Chrysler Jeep Dodge in Redcliffe (www.northstarchrysler.com.au).

Some of those luxury touches include carbon matte trim and the massive 8.4-inch Uconnect touchscreen navigation system. Much more than just a navigation system, Uconnect controls the temperature inside the vehicle and audio controls. Cast aluminium paddle shift controls allow drivers to change gears without taking their hands off the leather-wrapped wheel.

The SRT8 CORE engine is at the heart of this automobile. The V8 HEMI generates 347 kW and 631 Nm of torque while an active valve exhaust system powers the rear wheels through five transmission speeds. Ready Alert Braking helps decrease the stopping distance of this beast in emergency situations. Drivers who are interested in the performance of their vehicle can monitor acceleration and g-force distribution on the Electronic Vehicle Information Center (EVIC).

With such powerful performance, Chrysler has made certain to include equally powerful safety features. Cabin protection features include: intelligent front-seat thorax side, driver-knee and

side-curtain airbags. Rear-end collision safety measures protect occupants from threats from behind. LED lights enhance visibility, helping the vehicle be seen as much as they help the driver see.

Test-drive the Chrysler SRT8 CORE in Brisbane at Northstar Chrysler Jeep Dodge in Redcliffe. The dealership books test drives online or you can visit them in person at 320 Anzac Avenue, Kippa-Ring 4021, Redcliffe, QLD.

About Northstar Chrysler Jeep Dodge Redcliffe: Northstar Motor Group is Southeast Queensland's largest Chrysler, Jeep, and Dodge dealer. Serving the Brisbane auto market since 1968, the family-run company has grown to include five locations.
