

AEC Technology Wins AABE Award For Innovative Business Printer Program

AEC Technology has won an Annual Award for Business Excellence from the Daily Herald Business Ledger. The company distributes large format printers.

ST. CHARLES, IL, USA, June 16, 2014 /EINPresswire.com/ -- [AEC Technology](#) has won an Annual Award for Business Excellence (AABE) from the Daily Herald Business Ledger. The company was recognized for their innovative [free printer](#) program, which ensures their customers have the most up-to-date wide format printing equipment available. AEC Technology supports the architecture, engineering and construction industries, by offering sales and service on large format printers, plotters, scanners and copiers.

"We are extremely honored to be chosen for the Innovation in Business Award from the Daily Herald Business Ledger. The Business Ledger is a well-respected publication within our industry and to be recognized with an award from them is a huge accomplishment for us," said [Jerry Rushing](#), Owner, AEC Technology (www.aectec.com).

AEC's Free Printer Program is designed to minimize the upfront costs of purchasing large format equipment while at the same time providing guaranteed service and support. Through the program, AEC customers can select a new or refurbished printer for free. They are able to upgrade, add or cancel equipment at any time and receive dedicated technical support via a full service maintenance agreement with AEC Technology.

"Our Free Printer Program continues our innovative business model by incorporating both sides of saving upfront costs while maintaining the piece of mind of not having any unexpected service costs. As our programs are successful that helps us provide an even higher level of support to our customers, we are once again very excited that we have discovered a new way to help support our customers with no equipment costs and guaranteed service and support," said Rushing.

AEC Technology is no stranger to innovation, the company is constantly brainstorming new and inventive ways to help customers cut costs while still maintaining the level of service and support needed to keep their organization running smoothly.

Their 3 Year Warranty is another example of thinking outside the box. Extended warranty service provides their customers with the peace of mind that comes with not having to worry about

ongoing service related costs.

"We want to do everything we can to help our customers concentrate on what they do best, growing their businesses. The 3-Year Warranty is just one example of how we support our customers. It took us a quite a while to figure out how we could provide that level of warranty, especially nationwide, but with a strong determination we discovered an innovative way to make that happen. The printer program is really no different. Where there's a will, there's a way," explained Rushing.
